TOTAL DUE _____

RECEIVED BY: _____

The total tonnage is not listed on this receipt. Instead, the size of the truck is listed. The submitter needs to estimate the tonnage hauled based on the amount of cubic yards hauled times the conversion factor of the specified material (1,800 lbs/cy for concrete, 1,400 lbs/cy for asphalt). After the submitter estimates the total tonnage, then that total needs to be placed in the Asphalt & Concrete section, the Recycle column under Section II of the WMP.
