

VERY IMPORTANT: Breeding season 2012 has begun. Cats and kittens over 5-6 months of age are old enough to breed, and should be spayed or neutered as soon as possible. **If any cat under your care is pregnant, you are urged to have her spayed immediately.** Please do not wait for our clinic. It may be too late, and you will be faced with a litter of unwanted kittens. **For information on how you can have this done now at NO COST, please contact me at info@snipcat.org.**

If you have urgent questions or concerns about your situation, don't hesitate to request a return call. Please provide your day and evening telephone numbers and the best time to reach you.
